

MembraSens 4.0

Digital electronic board for usage with 3E and 4E sensors.

- **Only available for Compact housing**
- Individually configurable AFEs with default configuration
- **or**
- Equipped with sensors and pre-calibrated
- Available with **free of charge** Software panel

Pre-calibrated transmitters

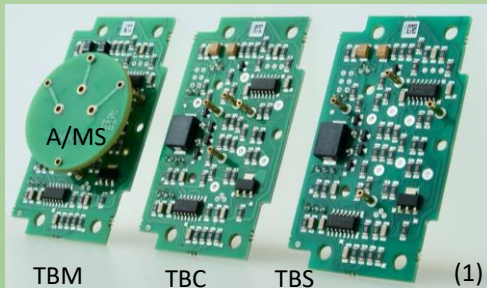

Analog transmitter + sensor pre-calibrated for measurement range.

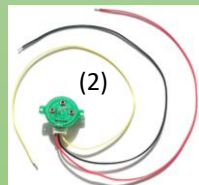

- **Available for all housings**
- Pre-calibration to desired measurement range using standard gas mixtures. Not available for all gases and concentration ranges
- Calibration certificate is provided
- **Only available as entire set**

Analog electronic boards

Pre-configured analog electronic boards.

- (1) Pre-configured 4-20 mA transmitters for all sensor types **except** O₂, 2E and 4E-sensors
- A/MS Adapter can be purchased separately
- (2) PCB with mV output for O₂ sensors

Sensor module

Sensor module with pre-calibrated 4-20 mA transmitter and mounted gas cap.

- **Only available for Slim housing**
- Pre-calibrated for desired measurement range
- Calibration certificate is provided
- **Only available as entire set**
